PROFESSIONAL SUMMARY

Backend Engineer with 3+ years of experience specializing in Node.js and PHP, delivering backend systems across web and e-commerce industries. Started with a PHP foundation building custom plugins, workflows, and API integrations, then fully transitioned into Node.js for scalable REST APIs and backend services. Recently built and deployed RAG based AI chatbots using OpenAI API and embeddings. Experienced with AWS (EC2, S3, Lambda), Cloudflare CDN, and CI/CD automation via GitHub Actions.

SKILLS

PHP Node.js REST API Development MySQL MongoDB OpenAI API RAG Chatbots
Embeddings Vector Storage AWS EC2 AWS S3 Lambda Cloudflare CDN
GitHub Actions HTML CSS JavaScript jQuery Git Postman Stripe Webhooks
WordPress WooCommerce

EXPERIENCE

Backend Engineer

Apr 2022 to Present

Tech Prastish Software Solutions Pvt Ltd, Mohali

Node.js, AI and Cloud (2023 to Present)

- Built and deployed scalable REST APIs and backend services using Node.js and Express.js across multiple client projects
- Designed and deployed RAG based AI chatbots using OpenAI API, embeddings, and vector storage enabling intelligent, document aware customer support
- Deployed and managed applications on AWS (EC2, S3, Lambda, CloudFront) and automated deployments via GitHub Actions CI/CD pipelines
- Developed webhooks and event driven logic for order management and inventory sync across platforms

PHP and WordPress / WooCommerce — Prior Background (2022 to 2023)

- Built custom PHP plugins and backend workflows for 5+ client platforms across retail and service industries
- Extended WooCommerce functionality with custom checkout flows, dynamic pricing rules, and role based access control
- Integrated third party payment gateways, shipping APIs, and handled data migration across platform transitions

RECENT PROJECTS

Rockjumper Birding Tours | Backend Migration and AI Chatbot

rockjumperbirding.com

Tech Stack: Node.js, OpenAI API, Vector Storage, Embeddings

- Led backend migration from PHP to Node.js, rebuilding core APIs for improved scalability and maintainability
- Designed and implemented a RAG based AI chatbot using OpenAI API, embeddings, and vector storage enabling users to get intelligent answers about tours, destinations, and booking policies
- Maintained feature parity during migration with zero disruption to live platform operations

ORYX Photo Tours | Image Infrastructure and Performance

oryxphoto.com

Tech Stack: AWS Lambda, AWS S3, AWS EC2, Cloudflare CDN, Node.js

- Provisioned and managed AWS EC2 instances to host the Node.js backend, configuring server environment, security groups, and deployment setup
- Built image optimization pipeline using AWS Lambda to automatically compress and resize high resolution wildlife photography on upload, significantly reducing file sizes without quality loss
- Configured Cloudflare CDN for global asset delivery, significantly improving page load times for an image heavy photography tour platform with international visitors
- Set up GitHub Actions CI/CD pipeline for automated testing and deployment of backend services to EC2

- Stored and served optimized images via AWS S3 with Cloudflare sitting in front as the CDN layer

Rockjumper Birding Tours | Backend System

rockjumperbirding.com

Tech Stack: PHP, Infinity, Stripe, WordPress

- Worked as backend developer for a global bird watching tour platform managing 300+ annual scheduled tours across multiple continents
- Built and maintained custom tour guide workflow management system handling guide assignments, availability, and tour scheduling logic
- Developed automated email notification and promotional communication workflows for tour bookings, reminders, and special offers
- Integrated Stripe payment gateway supporting multi currency bookings with deposit and pay later flows

EDUCATION

Bachelor of Technology, Computer Science

2018 to 2022

I.K. Gujral Punjab Technical University
